Next install Socks Cap [Download].</p> <p>After you finish installing you need to configure Socks Cap. Upon running it the first time, the settings screen should appear right after the EULA. If you ran Socks Cap before, go to File > Settings</p> <p>Configure it as seen here:</p>

When the main window appears, click New > click Browse > Point to WoW.exe

It should look like this:

If you have done everything correctly, double click on WoW from the Socks Cap menu and everything should work.

Enjoy

For the Blizzard downloader just add the downloader file (should be named like this: WoW-1.6.0.4500-to-1.6.1-enUS-downloader.exe) to Socks Cap/Free Cap and you should be able to download them without much problems.

Also make sure you're using the latest beta of HTTP-Tunnel when running WoW. The betas are available in the support subforum here.
